

# 8<sup>th</sup> INTERNATIONAL CONFERENCE ON LEAD-ACID BATTERIES

7 - 10 JUNE 2011, ALBENA, BULGARIA

## PROCEEDINGS

(EXTENDED ABSTRACTS)

Organized by:

LEAD-ACID BATTERY DEPARTMENT  
INSTITUTE OF ELECTROCHEMISTRY  
AND ENERGY SYSTEMS  
BULGARIAN ACADEMY OF SCIENCES  
SOFIA 1113, BULGARIA

GENERAL SPONSOR

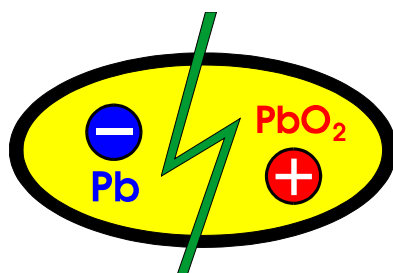

SPONSOR

**8<sup>th</sup> INTERNATIONAL CONFERENCE  
ON LEAD-ACID BATTERIES**

**LABAT'2011**

7 – 10 June 2011  
Flamingo Grand Hotel  
Albena, BULGARIA

**PROCEEDINGS**  
**(Extended Abstracts)**

Organized by:

**LEAD-ACID BATTERIES DEPARTMENT**  
**Institute of Electrochemistry and Energy Systems (IEES)**  
**Bulgarian Academy of Sciences**  
**Sofia1113, BULGARIA**

**General sponsor**  
**MONBAT PLC, Montana, Bulgaria**

**Sponsor**  
**ELHIM-ISKRA JSC, Pazardzhik, Bulgaria**

**The PROCEEDINGS** has been compiled  
by **Dr. Geno Papazov**  
IEES - BAS, Sofia, Bulgaria

# 8<sup>th</sup> INTERNATIONAL CONFERENCE ON LEAD-ACID BATTERIES LABAT'2011

## ORGANIZER:

LEAD-ACID BATTERIES DEPARTMENT  
INSTITUTE OF ELECTROCHEMISTRY AND ENERGY SYSTEMS (IEES)  
BULGARIAN ACADEMY OF SCIENCES  
SOFIA 1113, BULGARIA

## INTERNATIONAL ADVISORY COMMITTEE

**Dr. David Boden**, *Hammond Group Inc., U S A*  
**Dr. Henry Catherino**, *US Army RDECOM, U S A*  
**Prof. Hongyu Chen**, *South China Normal University, CHINA*  
**Prof. Vahid Esfahanian**, *University of Tehran, IRAN*  
**Dr. Antonio Ferreira**, *Grupo Moura, BRAZIL*  
**Dr. Mike Halls**, *Batteries International, UNITED KINGDOM*  
**Prof. Nobumitsu Hirai**, *Osaka University, JAPAN*  
**Dr. Massimiliano Ianniello**, *SOVEMA S.p.A., ITALY*  
**Dr. Yury Kamenev**, *JSC "Electrotyaga", RUSSIA*  
**Prof. Ivan Kazarinov**, *Saratov State University, RUSSIA*  
**Dr. Michael A. Kepros**, *Kepros Battery Consulting Ltd., U S A*  
**Dr. Lan Trieu Lam**, *CSIRO Energy Technology, AUSTRALIA*  
**Dr. Boris Monahov**, *ILZRO/ALABC, U S A*  
**Dr. Yasuhide Nakayama**, *GS Yuasa Corporation, JAPAN*  
**Dr. Robert Nelson**, *Axion Power Battery Manufacturing, U S A*  
**Dr. Marion Perrin**, *Institut National de l'Energie Solaire - INES RDI, FRANCE*  
**Dr. John R. Pierson**, *Consultant, U S A*  
**Dr. Dirk Uwe Sauer**, *RWTH Aachen University, GERMANY*  
**Dr. Masaaki Shiomi**, *GS Yuasa Corporation, JAPAN*  
**Prof. Ashok Shukla**, *Indian Institute of Science, INDIA*  
**Dr. Francisco Trinidad**, *Exide Technologies, SPAIN*  
**Prof. Alexander B. Velichenko**, *Ukrainian State University of Chemical Technology, UKRAINE*  
**Dr. Ramanathan Viswanathan**, *Tractors and Farm Equipment Ltd., INDIA*  
**Dr. Rainer Wagner**, *Akkumulatorenfabrik MOLL GmbH & Co.KG, GERMANY*  
**Prof. Zeli Wang**, *Battery Commerce Chamber Intl., CHINA*  
**Dr. Gerry Woolf**, *Energy Storage Publishing Ltd., UNITED KINGDOM*  
**Dr. Lyudmila Yolshina**, *Urals State Technical University, RUSSIA*  
**Prof. Larbi Zerroual**, *University of Setif, ALGERIA*  
**Dr. George Zguris**, *Hollingsworth & Vose Co., U S A*

## **GASTON PLANTÉ MEDAL**

The Gaston Planté Medal will be awarded to the next recipient, selected by an International Planté Medal Committee, for significant contribution to the development of lead-acid battery science and technology.

### **GASTON PLANTÉ MEDAL COMMITTEE**

**Dr. Kathryn Bullock, Coolohm, Inc., USA**  
**Prof. Andrzej Czerwinski, Warsaw University, POLAND**  
**Prof. Carlos V. D'Alkaine, Federal University of Sao Carlos, BRAZIL**  
**Dr. Jun Furukawa, The Furukawa Battery Co., Ltd., JAPAN**  
**Prof. Yonglang Guo, Fuzhou University, CHINA**  
**Dr. Eckhard Karden, FFA Ford Forschungszentrum Aachen GmbH, GERMANY**  
**Dr. Florence Mattera, Institut National de l'Energie Solaire - INES RDI, FRANCE**  
**Dr. Eberhard Meissner, Johnson Controls Power Solutions Europe, GERMANY**  
**Dr. Karel Micka, The J. Heyrovsky Institute of Physical Chemistry, CZECH REPUBLIC**  
**Dr. Patrick T. Moseley, ILZRO/ALABC, U S A**  
**Prof. Dechko Pavlov, IEES – BAS, BULGARIA**  
**Dr. Ken Peters, ILA Consultant, UNITED KINGDOM**  
**Dr. R.David Prengaman, RSR Technologies Inc., U S A**  
**Dr. David A.J. Rand, CSIRO Energy Technology, AUSTRALIA**  
**Dr. Alexey Rusin, NPP 'Istochnik', RUSSIA**

### **GASTON PLANTÉ MEDAL MEDALLISTS**

<b>Dr. Ernst Voss, VARTA Batterie AG, Germany</b>	<b>1989</b>
<b>Dr. Paul Ruetschi, Leclanche S.A., Switzerland</b>	<b>1993</b>
<b>Prof. Detchko Pavlov, IEES, Bulgaria</b>	<b>1994</b>
<b>Dr. Kathryn Bullock, Medtronic, Inc., USA</b>	<b>1996</b>
<b>Dr. David A.J. Rand, CSIRO, Australia</b>	<b>1996</b>
<b>Dr. Norman Bagshaw, NEB Consultants, UK</b>	<b>1999</b>
<b>Mr. John Devitt, Consult. Electrical Engineer, USA</b>	<b>1999</b>
<b>Dr. David Prengaman, RSR Corporation, USA</b>	<b>2002</b>
<b>International Lead Zinc Research Organization, USA</b>	<b>2002</b>
<b>Prof. Zen-Ishiro Takehara, Kansai University, Japan</b>	<b>2005</b>
<b>Dr. Patrick Moseley, ILZRO/ALABC, USA</b>	<b>2008</b>

### **2011 GASTON PLANTÉ MEDAL NOMINEES**

**Dr. Ken Peters, ILA Consultant, UNITED KINGDOM**  
**Dr. Lan Trieu Lam, CSIRO Energy Technology, AUSTRALIA**  
**Dr. Eberhard Meissner, Johnson Controls Power Solutions Europe, GERMANY**  
**Dr. Boris Monahov, ILZRO/ALABC, USA**

No.	Contents	Page
<b>CARBON IN THE NEGATIVE PLATES</b>		
1	Carbon in the negative plate of VRLA batteries - a key to partial state of charge cycling B.Monahov, P.Moseley, A.Cooper	1
2	Carbon in lead-acid battery – structure and properties P.Atanassova, P.Kossyrev, G.Moeser, A.Kyrlidis, M.Oljaca	5
3	Addition of carbon blacks with different structure to the negative active mass for improving the HRPSoC performance of lead-acid batteries P.Nikolov, T.Rogachev, P.Atanassova, D.Pavlov	9
4	Lead-carbon electrode in lead-acid batteries, operating at HRPSoC duty D.Pavlov, P.Nikolov, T.Rogachev	13
5	Carbon honeycomb grids for advanced VRLAB negative plates A.Kirchev, N.Kircheva, M.Perrin	19
6	Carbon and graphite for lead-acid hybrid batteries. Electrochemical methods of testing at electrode level M.Fernández, N.Munoz, R.Nuno, F.Trinidad	23
7	Investigation of the effect of mechanical pressure on the performance of negative lead accumulator electrodes during PSoC operation K.Micka, P.Baca, P.Krivik, K.Tonar, P.Toser	29
8	Modifiable physical attributes of engineered, high-purity nano-structured carbon for lead-acid batteries A.Feaver, M.Maroon	33
9	Lead-acid battery with reticulated vitreous carbon as a carrier and current collector A.Czerwinski, S.Obrebowski, Z.Rogulski, J.Kotowski	37
10	Electrochemical behaviour of reticulated vitreous carbon-based positive electrode for lead-acid cells A.Czerwinski, S.Obrebowski, Z.Rogulski, J.Kotowski	41
11	Significance of active carbon and precipitated silica additives in negative lead-acid battery electrodes F.Wang, G.Shi, H.Chen, D.Fu, W.Weii, C.Dou	45
12	The use of a design of experiment approach to investigate the interactions of additives used in the making of the negative electrode in lead-acid batteries E.Ferg, C.Snyders	49
13	Preparation of an activated carbon suitable for lead-acid battery based on abandoned plastic R.Zhao, F.Wang, H.Li, G.Shi, H.Chen, Z.Xiong, J.Hu, H.Wang	55
<b>LEAD-ACD BATTERY TECHNOLOGY</b>		
14	Thermochemistry and reaction kinetics during paste mixing etc G.E.Mayer	59
15	Electrodeposition of PbO <sub>2</sub> -TiO <sub>2</sub> composites A.B.Velichenko, V.Knysh, T.Luk'yanenko, D.Girenko, R. Amadelli	61
16	Morphology and properties of electrochemically obtained PbO <sub>2</sub> nanocrystals L.Yolshina, A.Yolshin	65

17	Fundamental study of metal sulfate in sulfuric acid solution upon electrochemical reaction on lead electrode N.Hirai	<i>No abstract submitted</i>	
18	Identification and controlling of different crystal forms of PbSO <sub>4</sub> in lead- acid batteries A.Oweisi, R.Khani		69
19	Microporosity in lead acid positive plates. Its mechanistic origin in the production process C.D'Alkaine, P.R.Impinnisi, R.V.Palmer, G.de O.Brito		73
20	PbSO <sub>4</sub> as precursor for PAM electrodes. M.Foudia, M.Matrakova, L.Zerroual		77
21	Improvement of batteries by use of tetra basic seeds I.Klein, A.Pradourat		81
22	Materials for evolving lead acid battery performance requirements as the world moves towards a greener planet. N.Clement, G.Zguris, J.Wertz, A.Ashirgade		87
23	Study on performance of a new silica-based mixed gel electrolyte in lead-acid battery K.Pan, H.Chen, L.Dong, Zh.Xiong, J.Lu		93
24	Advanced valve technology for VRLA batteries K.Merz, A.Dulska		97
25	Automotive flooded lead-acid battery formation optimization K.Ravindranath, J.Chakrabarty, J.Albert, S.C.Chalasani		101
26	Equipment for the AGM battery production G.Semler		105
27	Total recycle of scrap lead-acid batteries; the environment friendly route G.A Mottaghizadeh	<i>No abstract submitted</i>	
28	Utilization problem of the lead-acid batteries in Poland E.Kamińska, R.Michalski, K.Sicińska, J.Merkisz		109
29	Improving the PSoC operational capability of the AGM VRLA product D.Sen Chaudhuri, P.N.Ghosh		113
30	Formation systems with acid recirculation technology the Inbatec design C.Papmahl		117
31	Battery recycling J.Simpson	<i>No abstract submitted</i>	
32	Electrochemical corrosion of mechanically deformed lead alloys M.C.Roma, M.Mena, P.Mortel		121
33	Study on microstructure in different raw materials for electrolytic-lead Q.Chen, J.Liu, H.Zhou, W.Weil, Z.Xia, L.Liu, Y.Chen, H.Chen		125
34	Effect of rare-earth metals on microstructure and electrochemical corrosion behavior of lead-calcium grid alloys in sulfuric acid solution W.Zhang, A.Li, H.Chen, T.Zhang, M.Fang, S.Liu, W.Zhang, W.Weil		129

## MODELLING OF LEAD-ACID BATTERY

- 35 Interpretation of processes at positive and negative electrode by measurement and simulation of impedance spectra 133  
J.Kowal, H.Budde-Meiwes, D.Uwe Sauer
- 36 The discharge models of the positive electrode of the lead-acid battery 137  
M.Semenenko
- 37 Application of Neural Network in predicting life of lead-acid battery 141  
E.Miriam, S.Ambalavanan
- 38 Adaptive lead-acid battery modeling using RC method 145  
P.Amiri, V.Esfahanian, F.Torabi, A.Jafari
- 39 Estimating and evaluating the state of charge and the parameters of a new dynamic model of lead-acid battery. *No abstract submitted*  
F.Coupan
- 40 New PbA battery modeling structure and validation capturing the Peukert effect 149  
S.Onori, A.Manenti, Y.Guezennec
- 41 A transient, non-isothermal, fully coupled model for predicting the potential drop, temperature distribution and corrosion rate in the lead-acid battery grids 153  
V.Esfahanian, F.Torabi, P.Amiri, A.Jafari
- 42 Modelling of VRLA batteries over operational temperature range using psuedo random binary sequences (PRBS) 157  
A.Fairweather, M.Foster, D.Stone
- 43 Life cycle impact assessment on lead acid battery *No abstract submitted*  
A.Li, W.Zhang, H.Chen
- 44 A general formulation for theoretical study of thermal runaway in batteries 161  
F.Torabi, V.Esfahanian
- 45 Enhancing the electrolyte injection in lead-acid reserve batteries 165  
F.Torabi, S.M.Tabatabaee, A.Roozbeh Araqi, S.S.Tabatabaee
- 46 Parameterization of ISS battery for intelligent management system 169  
A.Roy, G.Mondal, A.Bandyopadhyay, A.Bhattacharyya, D.Mazumdar, S.Chalasanani
- 47 Nature of contact corrosion layers on lead alloys: A study by impedance spectroscopy 173  
M.Burashnikova, I.Kazarinov, I.Zotova, V.Yagnyatinsky

## LEAD-ACID BATTERY OPERATION

- 48 1,2-acid effects on the synthesis and electrochemical behaviors of nanostructured lead dioxide and commercial positive plates of lead-acid batteries 177  
H.Karami, H.Taghizadeh Asl
- 49 Recent advances in Thin Plate Pure Lead (TPPL) batteries for motive power applications 181  
R.Kurian, M.Pope, W.Coldrick
- 50 Detailed analysis and description of inhomogeneous ageing of flooded lead-acid batteries caused by acid stratification 187  
D.Schulte, D.W.Sauer, G.Langer, E.Cattaneo, B.Riegel

51	An on-board capacity estimation method for PbA battery S.Onori, P.Spagnol, Y.Guezennec	191
52	Comparative impact of various mode of charge on the cycling life time of OPzS and OPzV batteries S.Genies	<i>No abstract submitted</i>
53	Passive mixing elements for electrolyte convection in flooded lead-acid batteries E.Ebner, A.Boerger, M.Wark, I.Koch, E.Meissner, J.Albers	195
54	Solid state reactions at metal/film/solution interfaces. The case of Pb/PbSO <sub>4</sub> /H <sub>2</sub> SO <sub>4</sub> interface C.D'Alkaine, L.M.de Souza, G.de O.Brito	197
55	Development of advanced flooded ISS batteries for micro-hybrid application in tropical climate A.Chowdhury, G.Mondal, A.Bhattacharyya, D.Mazumdar, B.Chakraborty	201
56	The review of VRLA battery concept S.Peng	205
57	Stationary batteries. Present and future A.I.Rusin, L.Hegai, A.Kudryavtsev	209
58	A universal way for gas-liquid flow control in the design of hermetical lead- acid batteries. I.Kazarinov, M.Burashnikova, N.Kadnikova	213
59	Experimental validation of electrolyte microstructures and potential trends in electric power storage engineering E.Suleimenov	217
<b>BATTERIES AND SUPERBATTERIES FOR HEV</b>		
60	Lightweight lead acid batteries for electric vehicle applications L.Wallis	221
61	A 12V/100 F substrate-integrated PbO <sub>2</sub> -activated carbon hybrid ultracapacitor M.K.Ravikumar, E.Niranjana, A.Banarjee, A.Sundar Rajan, A.Jalajakshi, A.S.Naga Raj, S.A.Gaffoor, A.K.Shukla	227
62	Research of VRLA battery with lead-carbon electrode for electric bicycle D.L.Kong, H.P.Tang, H.Li, S.N.Hua	231
63	The preparation and electrochemical properties of a novel Pb-carbon aerogels for super-battery G.Shi, G.M.Zhang, H.Chen, H.Wang, G.Xiao, C.Dou	235
64	Dynamic charge acceptance of lead-acid batteries: comparison of methods for conditioning and testing H.Budde-Meiwes, D.Schulte, J.Kowal, D.U.Sauer, R.Hecke, E.Karden	239
65	Hybridization of lithium batteries in off-grid stationary applications (HYLIS) B.Riegel, P.Nemec-Losert, K.Nikolowski, W.Commerell, A.Zimmerman, V.Späth	243
66	The use of a Polymat material to reduce the effects of sulphation damage occurring in negative electrodes due to the partial state of charge capacity cycling of lead acid batteries C.Snyders, E.Ferg, T.van Dyl	247

67	Effect of additives on the performance of negative lead-acid battery electrodes during partial state of charge P.Baca, K.Micka, P.Křivík, K.Tonar, P.Toser	253
68	Integrated high energy and power system including new generation BAT-CAP sources M.Mladenov, S.Veleva, V.Trenev, E.Petrov, D.Kovacheva, B.Tsyntsarski, N.Petrov	257
<b>ADDITIVES IN LEAD-ACID BATTERIES</b>		
69	Additive Basics : Where, Why, When, Which G.E.Mayer	261
70	Electrochemical behavior of organic expander's Up-414 and VS-A on lead electrode in sulfuric acid R.Khani, L.Karimi, A.Namazi	265
71	Production of organic additives which used VS-A in negative paste lead – acid battery from pulp and paper black liquor S.Bagheri, R.Khani, M.Ahmadi, M.Kohzadi	269
72	Electrochemical techniques to aid in the selection of appropriate additives for the negative plate in lead-acid battery S.Sen Gupta, D.Sarkar, S.Goswami, K.Adhikary, B.Chakrabarty, S.C.Chalasanani	273
73	Comparing performance of automotive lead acid batteries: application of Na <sub>2</sub> SO <sub>4</sub> in negative and positive electrodes paste M.Salehriahi-Dehkordi, A.Mehrabani-Zeinabad, S.N.Khorasani	277
74	Investigation of silicon and silica additives in flooded lead-acid cells A.Oweisi, H.R.Rashvand, B.Charaghi, M.S.Rahmanifar	281
75	Influence of sodium lignosulfonate on the performance of gelled-electrolyte of lead-acid batteries H.Li, H.P.Liu, A.F.Ren, H.Chen	<i>No abstract submitted</i>
76	Basic studies of ITE organic polymer activators for lead-acid batteries J.C.Nardi, A.Kozawa, L.Yang, K.Tachibana, Y.Ohba, S.Minami	<i>No abstract submitted</i>
77	ITE organic polymer activators for lead-acid batteries developed in Japan A.Kozawa, J.C.Nardi, F.Yamamoto, T.Nishina, K.Tachibana, Y.Ohba	<i>No abstract submitted</i>
