

9th INTERNATIONAL CONFERENCE ON LEAD-ACID BATTERIES

LABAT'2014

10-13 June 2014, Albena, Bulgaria

PROCEEDINGS

(EXTENDED ABSTRACTS)

ORGANIZED BY:

Lead-Acid Batteries Department
Institute of Electrochemistry and Energy
Systems, Bulgarian Academy of Sciences

General sponsor:

Also sponsored by:

Johnson
Controls

inbatec
for a better production

CABOT

SERI

IMERYS
Graphite & Carbon

No.

Content

LEAD-CARBON ELECTRODES

- 1 **Lead-carbon batteries for automotive and energy storage applications**
B. Monahov
- 2 **Carbon additives for deep cycling lead-acid battery applications (1)**
P. Atanassova, A. Du Pasquier, M. Oljaca, P. Nikolov, M. Matrakova, D. Pavlov
- 3 **Carbon additives for improving charge acceptance of flooded lead-acid batteries**
P. Atanassova, A. Du Pasquier, M. Oljaca, P. Nikolov, M. Matrakova, D. Pavlov
- 4 **High performance hybrid carbon materials for advanced lead-acid batteries**
D. Cericola, T. Hucke, M. Spahr
- 5 **A novel lead-carbon grid material for possible applications in lead-acid batteries**
L.A. Yolshina, V.A. Yolshina, A.N. Yolshin
- 6 **Study of interaction between lead and carbon by electrolytic deposition experiments**
J. Settlein, G. Sextl, S. Hartmann, V. Trapp, F. Guthlein, M. Gelbke, R. Wagner
- 7 **Influence of mechanochemical activation of lead powder with a carbon additive on the structural and electrochemical properties of the negative electrode of lead-acid batteries**
M. Burashnikova, T.S. Khramkova, I.A. Kazarinov, A.I. Paraschenko
- 8 **Carbon additives in negative active material of lead-acid batteries**
M. Dimitrov, B. Drenchev *No abstract submitted*
- 9 **Reuse and prolongation of lifetime of lead-acid batteries by hydrophilic carbon nanoparticles**
Sh. Ikeda, Sh. Kawasaki, A. Nobumoto, S. Kita, H. Ono, S. Ono
- 10 **New high capacity lead-acid battery with carbon matrix. Carbon lead-acid battery (CLAB)**
A. Czerwinski, J. Wrobel, P. Podsadni, M. Bystrzejewski, Z. Rogulski, J. Lach, K. Wrobel
- 11 **AGM-VRLA batteries with carbon honeycomb grids for deep cycling applications**
A. Kirchev, L. Serra, S. Dumenil, A. de Mascarel, G. Brichard, M. Alias, L. Vinit, M. Perrin
- 12 **Synthesis of a novel-structured carbon/lead composite and its application lead-carbon batteries**
G. Shi, X. Fu, H. Chen
- 13 **Effect of nano-structured carbon additives in lead-acid batteries operating under the HRPSoC duty cycle**
S. Mayavan, M. Kumar, S. Ambalavanan, V.M.K. Pilai

- 14 **Design and experimental validation of substrate-integrated lead-carbon hybrid ultracapacitors**
A. Banerjee, R. Srinivasan, A.K. Shukla
- 15 **Lead-carbon hybrid ultracapacitors with substrate-integrated-positive and pasted-positive configurations**
A. Banerjee, A.K. Shukla
- 16 **The effect of additives (carbon and TiO₂) on the performance of the lead-acid batteries**
L. Rekha, M. Venkateswarlu, K.S.N. Murthy, M. Jagadish
- 17 **Activated carbon materials for electrochemical supercapacitors and battery applications**
B. Tsyntsarski, N. Petrov, L. Stoyanov, M. Mladenov, R. Raicheff
- 18 **Investigation of the mutual interaction of carbon and organic expander on the performance of negative lead accumulator electrodes during PSoC operation – part 1**
P. Toser, P. Baca, P. Cudek, M. Frk, K. Micka

LEAD-ACID BATTERY TECHNOLOGY

- 19 **Development of VRLA 6V modules with optimized negative formulas and increased charge acceptance for mild hybrid applications**
F. Trinidad, J. Valenciano, C. Gimeno, M. Martin-Zarco
- 20 **The quantification and crystal size determination of tetrabasic lead sulphate used in the cured active material of positive plates in lead-acid batteries**
E.E. Ferg, N. Mambasa, L. Geyer
- 21 **Paste mixing and curing, part 2**
G.E. Mayer No abstract submitted
- 22 **Study on energy demands for curing process and reduction of CO₂ emission for lead-acid battery plant**
C. Catelli No abstract submitted
- 23 **Supersoft ultra highly refined secondary lead for critical applications**
D. Prengaman, T. Ellis, F.Fleming
- 24 **The influence of tin on excursion peak in lead-tin alloys**
J. Lach, S. Obrebowski, A. Czerwinski
- 25 **Recent development on formation with acid recirculation for LAB**
C. Papmahl
- 26 **Innovative containers and lids for OPzS - OPzV batteries**
A. Saoudi, T. Kaspar
- 27 **Does it is possible to produce lead-acid battery without waste emission?**
M. Zhang
- 28 **Effect of mineral additive on the electrical performance of lead-acid battery positive plate**
M. Foudia, L.Zerroual, M. Matrakova

- 29 **Physicochemical and electrochemical study of positive active mass modified by the addition of bismuth.**

N. Chahmana, L. Zerroual, M. Matrakova

LEAD-ACID BATTERY OPERATION

- 30 **Analysis of interaction between lead sulfate and lead electrode during charging process by using Electrochemical Atomic Force Microscopy**

Y. Arai, T. Tsutsumi, Y. Yamaguchi

- 31 **Characterizing AGM battery performance based on negative plate behavior**

A. Hammouche, J. Bauer, S. Goertler, B. Ehrlich, S. Gerner

- 32 **Thermal runaway in AGM VRLA and separator design.**

M. Dimitrov, B. Drenchev, A. Aleksandrova No abstract submitted

- 33 **Stability analysis for thermal runaway in lead-acid batteries**

T. Nazghelichi, F. Torabi No abstract submitted

- 34 **pH differential power sources with electrochemical neutralization: Boosting the cell voltage of a lead-acid battery by hybridization with an alkaline metal hydride negative electrode**

K.Y. Chan, V.C.Y. Li, G. Weng

- 35 **Operation strategies for VRLA batteries in PV-Home solar systems**

G. Langer, B. Riegel, E. Cattaneo

- 36 **Development of lead-acid batteries for ISS use**

K. Kogure, M. Tozuka, T. Shibahara, S. Minoura, M. Sakai

- 37 **Electrolyte additives: CVA, Tafel and gassing**

G. E. Mayer No abstract submitted

- 38 **High quality safety valve for AGM lead-acid automotive batteries in Start/Stop operation**

K.D. Merz, A. Farrugia, J. Pule, A. Cassar, G. Schembri

- 39 **"State of health" of electrodes of starter lead-acid batteries operated at zero temperatures.**

M. Matrakova, V. Naidenov

- 40 **CFD simulation of lead-acid batteries: Effect of temperature variation**

V. Esfahanian, N. Narjabadifam, P. Olad, A.B. Ansari, S. Hasanpour

- 41 **The optimization of lead-acid battery electrode thickness using PSO algorithm by using Neural networks**

V. Esfahanian, S. Hasanpour, A.B. Ansari, N. Narjabadifam, P. Olad

- 42 **Integrated supervisory and control system for backup power and traction batteries**

S. Voutetakis, Ch. Ziogou, D. Giaouris, F. Stergiopoulos, C. Elmasides, S. Papadopoulou

43 **Comprehensive study of relaxation behaviour of lead-acid batteries for State-of-Charge estimation in automotive applications**
G. Pilatowicz, J. Badedo, H. Budde-Meiwes, J. Kowal, Ch. Sarfert, E. Schoch, M. Koenigsmann, D.U. Sauer

44 **Storage of photovoltaic energy in lead-acid batteries**
N. Achaibou, A. Harikenchikh, D. Ghribi

Pb/PbO₂/PbSO₄ ELECTRODES

45 **Invertibility in electrochemical reaction. The case of discharge/charges at non-porous PbO₂/H₂SO₄ electrodes**
C. D'Alkaine, F.F. Plut

46 **Effect of various alkaline metal ions on electrochemical behavior of lead electrode in sulfuric acid solution**
N. Hirai, Y. Yamamoto

47 **Correlation between the electrochemical activity and the crystallite size of PbO₂: a comparative study between the chemical and electrochemical routes**
L. Zerroual, M. Matrakova

48 **Nano-structured PbO₂ electrode for lead-acid battery.**
A. Moncada, R. Inguanta, S. Piazza, C. Sunseri

49 **Influence of ionic dopants on physicochemical properties of PbO₂ deposited from methanesulfonate electrolytes**
A.B. Velichenko, O.B. Shmychkova, T.V. Luk'yanenko, R. Amadeli

50 **Efficient use of lead-acid battery**
E. Nefedov, R. Tenno

51 **Methods and programming equipment for management, control and registration of battery monitoring**
S. Gishin, S. Zahariev, K. Kirilov

52 **Pressure Influence on the structural characteristics of modified AGM separators: A standard contact porosimetry study**
M. Burashnikova, T.S. Khramkova, I.A. Kazarinov

53 **State-of-the-art solutions in the field of pressure sealed stationary batteries**
A. Rusin, A. Kudryavtsev, L. Kheday, G. Demin

54 **Study of the electrochemical performance of PbO₂ prepared from the intermediate oxides PbO_x (1.33<x<1.66)**
L. Rahmani, Pr.R. Fitas, L. Zerroual

55 **Analysis on the deterioration mechanism of lead-acid batteries (1)**
K. Sumiya, H. Hirano, T. Hidaka

56 **Analysis on the deterioration mechanism of lead-acid battery (2)**
T. Hidaka, H. Hirano, K. Sumiya

- 57 **Method of real time diagnostics for the basic performance parameters in lead acid batteries**

A.A. Aleshkin, Y.I. Bubnov, O.G. Ruzhnikov, V.M. Yagnyatinskiy

- 58 **Evaluation of physical properties of sulfuric acid-water mixtures**

L. Oca, J.M. Campillo-Robles, M.M. Bou-Ali, B. Ballesteros

LEAD-ACID BATTERY MODELLING

- 59 **Simulation of lead-acid battery using model order reduction**

V. Esfahanian, A.B. Ansari

- 60 **Closed form solution of lead-acid batteries governing equations**

S. Azizi, F. Torabi

No abstract submitted

- 61 **Modeling the crystal distribution of lead sulfate in lead-acid batteries with 3D spatial resolution**

M. Huck, J. Badeda, D.U. Sauer

- 62 **A hybrid methodology to predict SOC and SOH of lead-acid batteries based on EIS techniques**

C. Aksakal, A. Sisman

- 63 **Experimental evaluation of equalizing exchange currents in lead-acid batteries due to acid stratification for 3D simulation**

J. Badeda, M. Huck, D.U. Sauer, G. Langer, E. Cattaneo

- 64 **Electrochemical impedance spectroscopy and internal resistance as methods of estimation of lead acid batteries condition**

W. Majchrzycki, M. Baraniak, E. Jankowska, P. Handzlik, A. Lazar, R. Samborski

- 65 **Modeling the impact of paste additives and pellet geometry on paste utilization within lead-acid batteries during low rate discharges**

M. Vargonen

- 66 **Lifetime improvement by combination with Ultra-Capacitor**

M. Tehrani, V. Esfahanian, D. Bazargan

No abstract submitted

- 67 **Dynamic charge acceptance measurements and modeling in Ultra batteries**

K. Fewing, D. Stone, J. Green, M. Foster

- 68 **Experimental study of lead-acid battery regeneration. Performances modelling in time**

F. Astier, P. Mandin, G. Boyer

LEAD-ACID BATTERY RECYCLING

- 69 **Pb/PbO mixtures production: new STC process for direct lead-acid battery paste recycling**

G. Fusillo, F. Scura

- 70 **Study on a novel paste desulfurization process of the recycling of lead-acid batteries**

Y. Shu, Q. Gao, H. Chen

- 71 **Study on recovery of lead from waste slag of secondary lead smelting**
Y. Shu, L. Zhu, H. Chen
- 72 **Manufacture of novel fibre based electrodes for lead-acid batteries**
M. Mrovcak, N. Ludford, A. Rexach, TWI Ltd., UK
L. Marston, FibreTechnology Ltd., UK
- 73 **Deposition of protective coatings on lightweight metallic substrate for lead-acid electrodes**
M. Mrovcak, N. Ludford, TWI Ltd., UK
C. Mellors, MIRA Ltd., UK
